### About This Content

One of our favorite game features is being able to see the flow of time, and what a better way to do so than with a set that pays homage to all the seasons?

Created by Sherman3D, this pack includes basic buildings and outer town decorations that are suited to spring, summer, autumn and fall. In addition, this pack hits several different architectural angles, giving you a chance to create atmospheric maps and

locations.

- Tile B-D includes building add-ons and decorative objects, along with seasonal trees.
- Material that matches the standard RPG Maker MV tiles, while still giving you a new and unique look.

rpg maker mv town of seasons

This is the story of how the Death Star plans got stolen, Disney can't change that.. Gets pretty crazy, yo.. Loved it, for like 5 hours.

Its a good hacking gae in the void of a better "uplink" game..

The problem with it that it is possible to "get lost" in the quest line if you delete the wrong email or destroy the wrong government, or crime syndicate.

The hacking is primitive, and gets old after the 50th time.

It gets a bit "harder", but its the same patterns.

7/10 overall.. This game is a simple, but highly entertaining diversion. Alternating between moments of madcap micromanagement and peaceful chill time, this game is both relaxing and engaging.

Couple that with an elegant aesthetic and refreshingly straightforward menu system, and this is a 5-star casual game, in my book.. This is a fantastic piece of software that greatly improves a number of existing VR games. The locomotion feels pretty good, you can test it yourself in the demo. If you have any game with smooth trackpad motion, you owe it to yourself to get this software (which is a steal at \$10).. "acid trip gone mediocre"

~my brother, 2k16. This is a pretty standard browser/mobile style game and while some of them are good this one is not. The biggest issue is how the premium currency works. In most games like this you have Gold, Premium Currency, and "Free Premium Currency". In other games you earn the "Free" version slow, and while it doesn't work on everything it does work on most. In this game you earn the "Free" version slow but the worse part is you can't even spend it on anything useful. I was actually struggling to find anything useful at all with it. It is so bad in fact entire portions of the game are locked out unless you spend the Premium version. In other games u can at least "get your feet wet" in all the different upgrades and paths. Unless you plan on dumping money into it I wouldn't recommend. **DO NOT PLAY THIS IF YOU DON'T PLAN ON SPENDING REAL \$\$\$**. Many other games just like this are out there that are much more fair to f2p players.

\*\*\*New Edit\*\*\* Because of the news about the 1.1 patch, I have changed the status of my review. Being able to equip multiple cosmetics per category make it much more worth it imo. Thanks!

\u2014(edit)\u2014

Yeah, support the devs with it. But the devs should also add the ability to equip multiple cosmetics. If I have a goatee, let me wear some glasses with it. Make it worth it fellas. They make this happen, I will thumb it up without question.

15 dollars so you can have a beard.

pretty bad dlc.. The game was better than I expected, the controls are alright, a bit sluggish at some parts but we can overlook that part.

Sounds are great, the gun stacker is also a great idea (you can combine a lot of weapons eg. 6 chainsaws).

There are enough types of enemies that you can get surprised (also laugh at some of them).

Overall, the game is worth the money, you will be surprised when you try it.. Was waiting to review until I unlocked the second ship. So here is an overall review of the game:

#### **PRO's:**

##### **PRICE (Well worth it)**

**The difficulty is well balanced and substantially gets harder after I unlock the second ship.**

**Love the explosions and variation of the explosion sounds**

**The background music is enjoyable, but I also love the mute option! haha**

**Always love when games put in the classic screenshake!**

**Enjoyed the multiple styles of ships ! I have only played with the first two but the second one is awesome!**

#### **CON's:**

##### **Lack of configuration options**

**Would love to see a global leaderboard and not just local**

#### **OVERALL**

**The game was a good fun fast paced shooter based in space with a mix of the classic and newer technologies with good explosions and sfx. Would love to see some more configuration options and more ships! Overall a great buy for a only \$0.99!**

#### **SUGGESTION**

**Buy if you like small fun shootemups that will keep you distracted for a couple hours for under \$1.00 on sale!**

**. Cheesy little overhead shooter. As expected if you've ever played any Sigma Team game. Burn some time laying waste to huge masses of enemies, and get a boner when you win. Cause anything you accomplish boosts your ego. Graphics are mediocre, sounds are decent, gameplay is half♥♥♥♥♥♥at best. If the fact that I have fully completed all the Sigma Team's "Shooter" endeavors tells you anything, take your own view on the recommendation.. this game doesn't work and guess what**

**it's not the only game in steam that**

**doesn't work and still they sell them. A well written VN. It's hard to say much else.**
