Radio Code Extractor is a utility that can help you extract the VIN/serial number of any machine with the radio model you want (e.g.: Vw Rcd 310). How to identify an unlocked VW Rcd310 with serial codes. Unlock Radio. Unlocking a VW radio requires some basic knowledge of how code are generated. You will need to know In this tutorial we learn how to remove the black screen and code warning displayed in the vehicle's device. To do this you will use a serial number that will be used to generate a code that will be displayed on the screen. In case you are not able to locate the radio's serial number in the device's memory you can use this serial number to unlock a radio. In this tutorial we will focus on the Vw Rcd310. This is a very old radio model that has been replaced by the Vw Rcd510. However, it was designed in a very different way and if you locate the model name in the list above you can use this solution to solve the problem. The black screen and radio code warning problem is mostly associated with older radios. This is a little tutorial I created to help you solve a common problem that we have at work.This video will help you find your radio's VIN/serial

number. However, there is a simple tool that I recommend you to use before you continue. The tool is called Gxtract. Just download and run the program, it's really simple to use. Download Gxtract, extract all the contents of Gxtract.txt to the folder where the program is. Launch the program by double clicking on the.exe file. A main window will open. You can find the serial number of the device at the top of the window. Just copy and paste the f678ea9f9e
